Biological Processes T_v I lpv **p < 1e-05** b < 1e-04 p < 0.001 75/230 regulation of response to biotic stimulus 167/524 regulation of response to external stimulus 16/614 regulation of immune system process 9/19 regulation of viral transcription 36/128 regulation of symbiosis, encompassing mutualism through parasitism 29/98 regulation of viral process 78/238 positive regulation of multi-organism process 130/407 regulation of multi-organism process 20/48 regulation of viral transcription 20/48 regulation of DNA-templated transcription in response to stress 10/21 positive regulation of transcription from RNA polymerase II promoter in response to s 187/571 positive regulation of transcription by RNA polymerase II 214/697 negative regulation of RNA metabolic process 147/452 negative regulation of transcription by RNA polymerase II 211/703 intracellular signal transduction egulation of Rho protein signal transduction 2 negative regulation of protein metabolic process 3 regulation of protein phosphorylation 125/374 enzyme linked receptor protein signaling pathway 213/628 cellular response to endogenous stimulus 264/752 regulation of nervous system development 192/576 regulation of cell projection organization 17/324 regulation of cell morphogenesis 203/591 regulation of anatomical structure morphogenesis 99/557 positive regulation of cell differentiation 7/220 regulation of synapse structure or 92/607 regulation of growth 5/242 modulation of chemical synaptic transmission 2/108 regulation of synaptic plasticity 80/84 positive regulation of synaptic transmission 183/590 regulation of locomotion 155/492 regulation of cellular component movement 103/280 neuron projection guidance 204/589 cell morphogenesis involved in differentiation 140/396 axon development 240/715 cell morphogenesis 153/408 taxis 49/150 developmental growth involved in morphogenesis **237/705** negative regulation of multicellular organismal process 130/400 negative regulation of cell population proliferation 26/79 neuromuscular process 14/36 neuromuscular process controlling balance 225/670 central nervous system development 222/639 tube morphogenesis 236/682 tissue morphogenesis 144/426 post–embryonic animal organ development 85/255 wing disc development 218/625 post-embryonic development 201/561 pattern specification process 178/483 epithelial cell differentiation 127/352 epithelial cell development 19/63 neuroepithelial cell differentiation 70/198 epidermis development 207/581 embryonic morphogenesis 114/325 sensory organ morphogenesis 191/562 sensory organ development 108/315 positive regulation of cellular component biogenesis 216/635 regulation of cellular component biogenesis 121/338 actin filament-based process 72/190 positive regulation of cellular protein localization 205/601 regulation of protein localization 199/557 regulation of cellular localization 136/436 regulation of establishment of protein localization 58/262 negative regulation of transport 83/550 positive regulation of secretion 34/424 regulation of transport 0/35 regulation of catecholamine secretion 44/135 positive regulation of ion transport 79/255 regulation of ion transport gulation of vesicle-mediated transport 23/65 courtship behavior 23/694 behavior 15/39 male courtship behavior 34/93 mating 100/279 cognition 78/241 locomotory behavior 76/220 regulation of membrane potential 174/541 cell-cell signaling 61/151 sensory perception of mechanical stimulus 122/332 sensory perception 211/595 nervous system process perception of chemical stimulus of stimulus involved in sensory perception 59/175 response to mechanical stimulus 203/544 microtubule-based process 25/61 cilium movement 88/218 microtubule-based movement 41/90 microtubule bundle formation 260/703 cytoskeleton organization 13/28 axonemal dynein complex assembly 12/3/41 cell projection assembly 5 DNA metabolic process DNA-dependent DNA replication 5 small molecule biosynthetic process cellular biogenic amine catabolic process 80/272 small molecule catabolic process 213/652 organic acid metabolic process 57/174 carboxylic acid catabolic process 43/117 membrane lipid metabolic process 214/658 lipid metabolic process 7158 lipid catabolic process 34/370 cofactor metabolic process 2/240 Suitur Compound Metabolic process 3/143 cellular modified amino acid metabolic process 2/62 respiratory electron transport chain 5/108 electron transport chain 7/66 oxidative phosphorylation 05/259 generation of precursor metabolites and energy 8/25 mitochondrial electron transport, NADH to ubiquinone 49/410 drug metabolic process 4/154 energy derivation by oxidation of organic compounds 3/54 aerobic respiration 105 cellular respiration 105 cellular respiration 9/598 oxidation—reduction process 163 nucleoside monophosphate metabolic process 0/452 nucleobase—containing small molecule metabolic process 9/327 purine—containing compound metabolic process 158 nucleoside triphosphate metabolic process 1652 organophosphate metabolic process 1652 organophosphate metabolic process 1653 mitochondrial respiratory chain complex I assembly 1653 mitochondrial respiratory chain complex assembly 26/3/6 carbohydrate derivative biosynthetic process 34/680 carbohydrate derivative metabolic process 6/87 protein localization to endoplasmic reticulum 6/77 establishment of protein localization to endoplasmic reticulum 61/90 protein targeting to membrane 50/77 nuclear-transcribed mRNA catabolic process, nonsense-mediated decay 140/360 organic cyclic compound catabolic process 108/273 peptide biosynthetic process 57/86 cytoplasmic translation 162/420 amide biosynthetic process 191/507 cellular amide metabolic process 55/99 translational initiation

b) Biological Processes
